	Green	Solid	Spare battery charged
	Amber-yellow	Solid	Powered by spare battery with adequate charge
		Flashing	Battery power is low
		Flashing and dimming	Battery power is depleting

Pair charger with phone

You must connect the charger to line power before starting this procedure.

1. Insert the phone into the charger and turn on the phone.
2. Press and hold the **Control** button on the side of the charger for 5 seconds. The Power/Bluetooth Status LED flashes and the charger is in pairing mode.
3. Choose ▽ 🗲 **> Phone Settings > Bluetooth**.
4. If first item displays `Bluetooth Disabled`, press **Select**, select **Enable**, and press **Save**.
5. Choose **Device List**.
6. Press **Scan**. A list of devices appears. It may take a few seconds for the scan to complete.
7. To rescan, press **Rescan**.
8. Select **Cisco Dock 7900** and press **Pair**.
9. If prompted, enter **0000** for the passkey, and press **Select** or choose **Options > OK**. The pairing completes.
10. Press the **End** button on the phone.

Change charger speaker volume

When the phone is docked, use the **Volume** buttons on the phone to raise or lower the speaker volume.

Mute operation

You can use the **Mute** button on the phone while the phone is docked.

Dock the phone

While the Power/Bluetooth Status LED flashes blue, the phone and charger are connecting. When the Bluetooth connection is made, the Power/Bluetooth Status LED lights solid blue.

If you are on a call when you dock the phone:

- If the Cisco UC Phone 7925G Desktop Charger is powered, there may be a slight delay while the Bluetooth connection completes, and then the call continues using the Cisco UC Phone 7925G Desktop Charger speaker.
- If the Cisco UC Phone 7925G Desktop Charger does not have power (line power or spare battery), the phone cannot connect to the charger using Bluetooth. The call continues, but you need to undock the phone to continue the call.

If the Bluetooth disconnects when the phone is docked, undock and dock the phone again.

When you undock the phone, Bluetooth disconnects and the phone uses the local speaker for audio.
