#### [TSD Products Security Advisory 2009-10-30](#)

##### [Cisco Security Advisory: Cisco IOS HTTP Server Query Vulnerability](#) 2006-03-17

A defect in multiple releases of Cisco IOS software will cause a Cisco router or switch to halt and reload if the IOS HTTP service is enabled, browsing to "http://router-ip/anytext?/" is attempted, and the enable password is supplied when requested.

##### [Cisco Security Advisory: Cisco Telnet Denial of Service Vulnerability](#) 2004-12-31

Data Link Switching (DLSw) and protocol translation connections may also be affected. Telnet, reverse telnet, RSH, SSH, DLSw and protocol translation sessions established prior to exploitation are not affected. All other device services will operate normally.

##### [Cisco Security Advisory: Cisco IOS Software TCP Initial Sequence Number Randomization Improvements](#) 2004-01-07

Workarounds are available that limit or deny successful exploitation of the vulnerability by filtering traffic containing forged IP source addresses at the perimeter of a network or directly on individual devices. This notice will be posted at <http://www.cisco.com>.

##### [Cisco Security Advisory: IOS HTTP Authorization Vulnerability](#) 2003-09-23

When the HTTP server is enabled and local authorization is used, it is possible, under some circumstances, to bypass the authentication and execute any command on the device. In that case, the user will be able to exercise complete control over the device.

# パーソナライズド機能の使用 – トラブルシューティング ダッシュボードの確認

The screenshot shows the Cisco Troubleshoot interface. At the top, there is a search bar and navigation links for 'Worldwide', 'Welcome', 'Account', and 'About Cisco'. Below the search bar is a navigation menu with categories: Solutions, Products & Services, Ordering, Support, Training & Events, Partner Central, and My Cisco. The main content area is titled 'Bid 3 Router IOS Troubleshoot' and features a 'Cisco 800 Series Routers' section with a 'Select a different product' link and an image of two routers. Below this is the 'Information Sources' section, which includes radio buttons for 'Release Notes', 'Security Advisories, Responses & Notices', 'Documentation', 'Command References', 'Field Notices', and 'Known Bugs'. The 'Release Notes' source is selected, and a list of 'Release Notes SDSP (1)' is shown, including 'Release Notes for 12.4(10b)JDA3'. A 'Related Information' section at the bottom shows a 'WIRELESS LAN' release with a 'Download Now' button and a green checkmark indicating it has been 'Added To Cart'. The release details include the filename 'ap801-k9w7-tar.124-10b.JDA3.tar', release date '13/JUN/2009', size '6050.00 KB (6195200 bytes)', and minimum memory requirements 'DRAM:32MB Flash:16MB'.
