

Cisco Deployment Services

Successfully deploy new solutions or applications by receiving expert assistance.

Successfully Deploying New Solutions

Integrating devices and new capabilities without compromising network availability or performance is critical to success. As you introduce new solutions or applications into your production network, you need to be sure they are deployed in accordance with your design.

Deployment services can help by providing expert assistance to develop implementation plans and to install, configure, and integrate new solutions or applications in your production network. They offer project management, post-implementation support, and ongoing knowledge transfer.

Service capabilities include:

- Infrastructure deployment
- Application deployment
- Operations management deployment
- Service management deployment
- Business management deployment

Benefits

A robust portfolio of services helps you to:

- Reduce delays, rework, and other problems during implementation with a detailed implementation plan and accurate estimation of the time and resource requirements
- Decrease disruption to your production network during deployment by identifying risks and creating plans for risk management before deployment begins
- Successfully deploy a new solution by following an in-depth, detailed implementation process based on leading practices
- Realize business and technical goals of the new solution by implementing it in accordance with your design and plans
- Support solution adoption by receiving post-implementation support and knowledge transfer throughout the engagement

Services from Cisco and our partners help you succeed at every phase of your network and IT lifecycle

Smart Service Capabilities – Our Difference, Your Advantage

More effectively manage the deployment of new solutions and applications by gaining continuous insight into the overall state of your network with Cisco® smart service capabilities. These capabilities provide visibility into the state of your infrastructure by automating the analysis of diagnostic network data and correlating it with Cisco's deep knowledge base. You get the benefit of our 28 years of industry experience with more than 50 million installed devices and 6 million annual customer interactions.

Why Cisco Services

Realize the full value of your network, IT, and communications investments faster and successfully harness the intelligent network as a powerful business platform with professional and technical services from Cisco together with our partners. Whether you are looking to evolve your network to support business continuity and growth, increase operational efficiency, reduce costs, enable a more reliable customer experience, or mitigate risk, we have a service that can help you. Cisco Services uniquely deliver innovative solutions, unmatched expertise, and smart service capabilities using a collaborative partner approach.

Cisco and Partner Expertise: Better Together

Cisco engineers and Cisco Certified Partners are among the industry's elite in providing integrated, collaborative, adaptive solutions. Jointly with our partners, we form the largest collection of industry-certified experts in the world supporting the most complex networks to meet and exceed the needs of our customers. Cisco teams can collaborate with partners to foster consistency and alignment with Cisco methodologies, tools, and leading practices.

Availability and Ordering

Deployment Services are available globally and can be purchased from Cisco and Cisco Certified Partners. Service delivery details might vary by region and depending on which service options you choose.
