

# The smart choice for smaller sites

## Benefits

- Flexible and scalable
- Simple setup in less than 10 minutes
- Industry-leading features
- Low Total Cost of Ownership (TCO)

*“Over 45% of Gen X and Gen Y professionals want the freedom to work anywhere at any time.”*

2015 Cisco Enterprise Mobility Landscape Survey

It’s never been more important for your employees and customers to have high-performance Wi-Fi. We know you need to do this cost effectively, in a way that can scale to meet your future requirements. Yet you may not have specialist IT resources. That’s why we have created Cisco Mobility Express.

## The functionality you need

Cisco Mobility Express provides enterprise-class functionality. At a price point that is accessible for organisations of any size. And it’s flexible, easy to deploy and easy to scale. So when your needs grow, it can grow with you.

It combines a virtual wireless LAN controller with Cisco Aironet access points, supporting 802.11ac Wave 2. Giving you the latest wireless LAN technology on the market.

## Simple to set up and maintain

Setup is fast with a simple over-the-air configuration. You simply download and use the Cisco Wireless app from Google Play or Apple App Store. And then you can deploy your Cisco wireless LAN in less than 10 minutes. Making it easy to use for organisations or locations with limited IT staff and resources.

It’s as easy as one, two, three:

1. Connect to an Aironet 1850 or 1830 access point using any wireless device.
2. Use the setup wizard to configure multiple access points simultaneously.\*
3. Operate, monitor, and troubleshoot your network using the dashboard.

Letting you manage up to 25 Access Points and 500 clients with a single Mobility Express virtual controller.

\*Your wireless network can contain a mix of Cisco Aironet 1850, 1830, 1600, 2600, 3600, 1700, 2700 and 3700 Series Access Points. You just need an 1850 or 1830 for the control function.

## Cost-effective for your business

---

Because it is easy to set up and manage your Wi-Fi with Cisco Mobility Express you can free up your IT staff from manual configuration. So you can lower the Total Cost of Ownership (TCO). And instead of simply 'keeping the lights on' in your network, you can focus on innovating.

## Get started today

Let's connect. Our scalable solutions for small sites will help you grow as a digital business. Ready to face the challenges and opportunities of the future.
