

Cisco Strategy and Analysis Services

Support new and future requirements by creating architectural strategies and transformational roadmaps.

Evolving Your Network Infrastructure to Support New Requirements

Business agility starts with preparation: anticipating the broad vision, requirements, and technologies needed to build and sustain a competitive advantage. As your priorities evolve and you plan to introduce new capabilities, it is critical to be sure that your network infrastructure and applications not only can support new requirements, but can also scale to support requirements of the future.

Strategy and Analysis Services can help you to effectively support new and future requirements by creating roadmaps for transforming your network architecture and operations management while optimizing costs, through deep expertise with Cisco® technology and integrating it to support business requirements.

These services assess your requirements, challenges, and business drivers, as well as the state of your current network architecture. They help you develop strategies, roadmaps, an operations plan, and a network service costing strategy including business case and ROI analysis to support business justification.

Service capabilities include:

- Infrastructure strategy and analysis
- Application strategy and analysis
- Operations management strategy and analysis
- Service management strategy and analysis
- Business management strategy and analysis

Benefits

Through a robust portfolio of services, we can help you to:

- Prioritize and focus network architecture transformation and management efforts by improving alignment to requirements and business drivers
- Successfully transform your infrastructure, IT management, people, and processes by identifying operations requirements and developing an operations support strategy

Services from Cisco and our partners help you succeed at every phase of your network and IT lifecycle

Smart Service Capabilities – Our Difference, Your Advantage

As you develop strategies for transforming your network, gain a clear view of what is running in your network environment and more effectively evaluate what needs to change with insight enabled through Cisco smart service capabilities. These capabilities provide visibility into the state of your infrastructure by automating the analysis of diagnostic network data and correlating it with Cisco's deep knowledge base. You get the benefit of our 28 years of industry experience with more than 50 million installed devices and 6 million annual customer interactions.

Why Cisco Services

Realize the full value of your network, IT, and communications investments faster and successfully harness the intelligent network as a powerful business platform with professional and technical services from Cisco together with our partners. Whether you are looking to evolve your network to support business continuity and growth, increase operational efficiency, reduce costs, enable a more reliable customer experience, or mitigate risk, we have a service that can help you. Cisco Services uniquely deliver innovative solutions, unmatched expertise, and smart service capabilities using a collaborative partner approach.

Cisco and Partner Expertise: Better Together

Cisco engineers and Cisco Certified Partners are among the industry's elite in providing integrated, collaborative, adaptive solutions. Jointly with our partners, we form the largest collection of industry-certified experts in the world supporting the most complex networks to meet and exceed the needs of our customers. Cisco teams can collaborate with partners to foster consistency and alignment with Cisco methodologies, tools, and leading practices.

Availability and Ordering

Strategy and Analysis Services are available globally and can be purchased from Cisco and Cisco Certified Partners. Service delivery details might vary by region and depending on which service options you choose.
